Control Stick Functions

The Nintendo 64 Controller contains a Control Stick which uses an analog system to read the angles and direction of its movement. This allows subtle control that is not possible using the conventional + Control Pad.

When turning the Control Deck power ON, do not move the Control Stick from it's neutral position on the controller.

If the Control Stick is held at an angled position (as shown in the picture on the left) when the power is turned ON, this position will be set as neutral. This will cause games using the Control Stick to operate incorrectly.

To reset the neutral position once the game has started, let go of the Control Stick so it can return to its center position (as shown in the picture on the left) then press START while holding the L and R Buttons.

The Control Stick is a precision instrument, make sure not to spill liquids or place any foreign objects into it.

Story

In earlier times, peace and prosperity reigned across the land, and no-one thought to question their good fortune or fear for the future...

Then, in the middle of the 19th century, a dark shadow spread across Wallachia, Transylvania, home to many a vampire legend. The spirits of the depraved and corrupt had roused the king of evil from his enforced sleep of 100 years...

Shapeshifting into a bat, a wolf, or coils of mist, he stalked the land...

Seeking the dark and shunning the light, he cursed the gods as he hunted...

Damned to eternal life, he sucked the blood of one young maiden after another...

Count Dracula, Lord of Darkness and Master of the Castle of Death, had risen again...

The peace and prosperity of the people utterly destroyed, a black cloud of despair spread over the land. Evil beings roamed through the towns, and those who refused to pledge allegiance to Dracula died horrible deaths.

It was then that two warriors came forth, called by fate to hunt down the Lord of Darkness and deliver the people from his evil...

About the Game

"Castlevania" is a game for one player only. Your adventure begins in the forest near Dracula's castle, then you progress towards the castle.

You select one of two different characters to play the game. The story varies depending on the character, but the ultimate aim is the same - to defeat the evil Count Dracula who has once again risen from the dead.

The two characters each have different weapons, with different offensive capabilities.
(See page 21 for details on characters).

Your character has a certain number of HP (hit points). You lose HP when you are injured by enemy attacks, fall into traps, or fall from locations above a certain height. If your HP level drops to zero, the game is over.
(See page 8 for details on what happens when a game ends).

If you fall into deep or bottomless watercourses, or from high places such as cliffs, or on to certain surfaces, you are "out" and the game is over.

You can save your progress by using "White Jewel" items located at various locations on the Map screen.
(See pages 12-13 for details on saving and loading data).
(See pages 18-19 for details on items).

When you defeat an enemy, you may receive gold or a red jewel.
(See pages 18-19 for details on items).

There are many traps waiting for you inside Dracula's castle. Pay close attention to your surroundings for clues on how to proceed safely.

Game Controls

The Controller Pak

Precautions for using the Controller Pak

- You can save data while playing "Castlevania" if you use a Controller Pak (sold separately).
 - Attach the Controller Pak to the Player 1 Controller before switching on the power to your Nintendo 64 game unit.
- (See page 12-13 for details on saving and loading data).
(Refer to the Controller Pak instruction manual for details on how to use the Controller Pak).

Game Notes

The memory capacity of each Controller Pak is divided into 123 pages. Nine pages are required to save "Castlevania" data. You can create four files in each "Castlevania" game note.

Controller Pak Menu

You can check what files are saved into your Controller Pak by holding down START and then switching on the power to the main unit (with the Controller Pak attached to the 1P Controller).

Controller Pak Error Messages

[Insufficient empty notes]

A minimum of 9 pages are necessary to save data in this game. You cannot save data with fewer than 9 free pages in the Controller Pak. You can continue on and play the game if you wish, but to play with the save function available, first switch the power off then on and delete 9 pages of data from the Controller Pak menu, or attach another Controller Pak.

[Controller Pak malfunction. Check the Controller Pak to insure that it is connected correctly.]

You can continue on and play the game if you wish, but you will not be able to save or load data. If this message appears when the Controller Pak is correctly attached, the Controller Pak may be malfunctioning. Selecting "Restore" may solve the problem but could cause data loss, so first try using a different Controller Pak.

[Controller 1 not connected]

Switch the power off, correctly attach the Controller Pak, and switch the power back on again. This game supports one controller only.

[Wrong device type]

This game does not support the Rumble Pak. Check that the Controller Pak is correctly attached and press the A button.

Controller Parts

Starting the Game

Basic Controls at the Select Screen

Control Stick (+ Control Pad): Select

A button: Set

B button: Cancel/Go back

Starting Up

Insert the game pak into your Nintendo 64 game unit, attach the Controller to Connector 1, check the Controller Pak is attached to the Controller, then switch on the power. Do not touch the Control Stick at this time.

Jewel Points

You lose Jewel Points when you do an item attack. The number you lose depends on the type of attack item you use. Without a sufficient number of Jewel Points, you won't be able to do item attacks. To increase your Jewel Point level, you need to pick up Red Jewels. There are two types of Red Jewels: small ones worth five points each, and big ones worth ten points each. (See pages 18-19 for details on items).

Sub-Screen

Press START during game play to check your current ability level and status, and to use items. Press START again to return to the game screen.

(See pages 18-19 for details on items).

What You See On Screen

Player Status

If you are hit with special enemy attacks, your status may change in either of the following ways:

Vamp

- What causes it: Being bitten by a vampire-type enemy (does not occur in every case).
- Symptoms: You become unable to use HP restoration items and do distance attacks. Then after a certain period of time turn into a vampire yourself. At this point the game ends.
- If you use a "Purifying Crystal" item, you will return to your normal status.
- If you are bitten by a vampire enemy, quickly move the Control Stick to escape.

Poison

- What causes it: Being hit with an enemy poison attack.
- Symptoms: The poison injures you at regular intervals and your HP level drops.
- If you use an "Poison Cure Ampoule" item, you will return to your normal status.
- V + P indicates simultaneous Vamp and Poison status.

Saving and Loading

- You can save data while playing "Castlevania" if you use a Controller Pak (sold separately).
- Nine pages are required to save "Castlevania" data. You can create five files in each "Castlevania" game file.

Data That Can Be Saved

- Your character
- Items
- Data linked with events
- Time of day
- Gold
- Type of ending (the character you were using when you cleared the game and the ending)
- Option settings

Saving Data

When you pick up a White Jewel Item (located at various places throughout the Map screen) a save message will appear. Select Yes or No with the Control Stick (+ Control Pad), and press the A button to set.

(See pages 18-19 for details on Items).

(Data is saved into the same file that you loaded).

Loading Data

1. Select "Game Start" from the Menu Screen, and press the A button to move to the File Select Screen.
2. Select the saved game you wish to play with the Control Stick (+ Control Pad), and press the A button to start playing.

Saving and Loading

Copying Data

1. Select "Copy" from the Menu Screen, and press the A button to move to the File Select Screen.
 2. Select the file you wish to copy and place you wish to copy it to with the Control Stick (+ Control Pad), and press the A button to set. A confirmation message will appear on screen; select "Yes" with the Control Stick (+ Control Pad) and press the A button to copy the data.
- If you copy data into a file that already contains data, the old data will be lost.

Deleting Data

1. Select "Delete" from the Menu Screen, and press the A button to move to the File Select Screen.
 2. Select the file you wish to delete with the Control Stick (+ Control Pad), and press the A button to set. A confirmation message will appear on screen; select "Yes" with the Control Stick (+ Control Pad) and press the A button to delete the data.
- If you copy data into a file that already contains data, the old data will be lost.
 - Data that has been deleted cannot be retrieved, so be careful when deleting.

Items

Attack Items

Attack items are "used" automatically as soon as you pick them up. You can use them immediately, and as many times as you want, provided you have sufficient Jewel Points. You lose your ability to do more attacks if your Jewel Point level falls too low. The number in brackets indicates the number of Jewel Points you need for that item attack.

(See page 19 for details on the game screen.)

(See page 20 for details on how to pick up items.)

Holy Water (3)

Bones turn up and injure your enemy.

Cross (5)

Spins around and around in a vortex towards your opponent.

Nail (2)

Flies in an arc towards your enemy.

Knife (1)

Flies fast and straight towards its target.

* There are many other Items for you to find in addition to the ones described above.

Character Profiles

Richard Schneider

Half of the ancient Belmont clan of vampire hunters, his blood drives him to oppose the might of Count Dracula. Wielding the holy whip of his ancestors, the young vampire killer begins his quest.

Attack 1 (Distance attack): Whip

Attack 2 (Short-range attack): Dagger

Carrie Fernandez

A young girl gifted with great magical powers. Sensing Dracula's return, she sets off alone to the dark castle. Now she must wield her inherited power in the fight against evil.

Attack 1 (Distance attack): Floating magic bullet

Hold down the B button for a short time, then release to do a more powerful attack.

Attack 2 (Short-range attack): Ring smash

Monsters

Skeleton Warriors

Skeletons brought to life by the fearsome dark power of Count Dracula. Skeleton Warriors are proficient at attacking with weapons and in groups with other enemy characters. Some have the power to regenerate over and over again after being injured.

Lizard Men

A half-man, half-lizard sub-human species found in the watercourses at the very bottom of Dracula's castle. Lizard Men tend to move around in groups, and are skilled at hunting in packs. They are relatively intelligent and are armed with battle axes and shields.

Monsters

Hell Knight

These undead knights are doomed for all eternity to guard Dracula's castle. Highly skilled with a pike and long sword, they make for a formidable enemy.

Pillar of Bones

An automatic cannon made of the skulls of giant beasts, used to protect Dracula's castle. It attacks with balls of flame or breath of fire.

Vampires

Doomed to eternal life by the curse of the evil Count, vampires are active after sunset and in dark rooms of the castle where the sun never shines. They attack stealthily in search of warm human blood. Be on your guard - they sometimes disguise themselves as villagers in order to get close to you.
